

*'I am able'. Corinthians 2 6:8*

This week, we have begun writing our own story about Bob, the Man on the Moon. Although we are only just beginning, the children have been showing off their handwriting, spelling, commas, exclamation marks, question marks and even speech marks! I can't wait to read the stories as they progress next week.

In Maths, we had a go at an actual arithmetic SATs paper this week! The children had a really good go at it and showed off their abilities to add, take away, multiply and divide. We then went through it afterwards and talked about the different strategies we could have used to solve each problem.

We have continued our space topic, and what the children don't know isn't worth knowing! They have amazing knowledge and I can't wait to create a display in class with all their ideas and interesting facts! Next week, we will start learning about Neil Armstrong and the Moon Landings.

Next week we will continue writing our stories. In Maths, we will start looking at statistics, using tally charts and pictograms to record. Each week, we will also practice quick arithmetic using plus, takeaway, multiplication and division.

Well done to Mia who won our shout out award for settling in to Year 2 so beautifully! Zachary won our class award for a great attitude to learning and Bronte won December's Headteacher's Award from growing in confidence and great progress in her learning!

Well done to Jessica who has won our competition in conjunction with Burnley council.

All children designed a poster to go on the side of the recycling trucks; Jessica's entry will now get sent to the council along with entries from other schools for a final judging panel. Well done!
